

January, 2012

"One thing I never really thought about until now is how Tabor Rotation makes teachers collaborate and forces them to have valuable discussions about effective instructional practices. I couldn't be happier! Thank you for bringing excitement to my math department. They are already implementing the rotations and the buy in has been established. All I have to do is sit back and enjoy watching the teachers engaging students in meaningful activities. I will be in touch about future visits—I know the money is well spent!"

-Intermediate School Principal

"It was great spending time with you and being TABORIZED!!! We really loved how you came and demonstrated how your system works with our students. You are so far ahead of other presenters because you reach out and demonstrate and move your words from paper into action. Being an educator, you know this is the only way teachers will have a true buy in into anything they perceive as new and challenging. Thank you—you are really a wonderful person."

-Intermediate School Math Curriculum Specialist

"The Tabor Rotation Training Package WORKS!!! After attending your session at CAMT this summer, our teachers realized we needed something different and better to help us plan for balanced mathematics instruction. After receiving the DVD and CD, I trained our teachers. Our 3rd and 5th grade teams who have been using Tabor are showing great promise. Both showed to be above the district in the latest round of Curriculum Assessments and more importantly, both are very high in the district for AGI (Average Growth Index). After working with them for many weeks with the planning part, they have taken it on and are now both planning efficiently within their teams."

-Elementary Instructional Facilitator

"I really do appreciate you taking the time to come on campus in person to work with teachers. I feel the staff now has a handle on the process and the ideas behind your strategies. New week, during the grade-level meetings, the teachers who were part of the planning session will present to the others so everyone is on the same page."

-Intermediate Principal

"As the new year begins, I wanted to share something with you...I am thankful that this petite, blonde lady from Texas came to our school and into my classroom and told me that I needed to change to benefit all of my students. Had you not come in a year ago I would still be doing the same things the same way. Thank you for all of your time and energy."

-High School Math Teacher
