

August, 2011

"I wish you had been there to show me this when I started teaching. I think my life would be easier now." -Primary Teacher

"I am in awe of these 2 days! The potential impact on our students here is phenomenal! And, on top of everything else...you have motivated and inspired us both personally and professionally. BRAVO!!!" - Kindergarten Teacher

"I realized last school year that my method of teaching math was not working. However, I was unsure how to begin with a new way to teach math but fully understood its necessity. Tabor Rotation I is opening a new door for me. I feel extremely excited about beginning this year with Tabor Rotation." - Elementary Level Teacher

"I am totally on board! We are sinking and the Tabor Rotation is like throwing us a life preserver. You thoroughly showed us your framework and explained in detail how to carry it out. When you say you will not leave us, I believe you! God sent you to us!" -2nd Grade Teacher

"This has been extremely motivating! You presented us with a system of sharing information in an effective way to be able to reach every student. I believe this will be like second nature once we begin the implementation phase and learn to

effectively plan for short and long term. THANK YOU!" -Elementary Teacher

"I'm ready to get started! I really love the Leadership Academy because I have not always had groups that made teaching at Teacher Time easy. I feel overwhelmed now but like the ability to implement pieces at a time makes me feel less stressed. I can also see how it can be used in other areas. Thank you for a great, classroom-changing workshop!" -Elementary Instructor

"I am a bit overwhelmed with all the information but know that once all the information is implemented, then it will all be worth the work put into it. I look back at all my previous students and wish they had had the experience with Tabor Rotation." - Elementary Teacher

"I really like Tabor Rotation and would love to start it in my class. It's a lot, but I know it will work. I am scared of change and of failing, but I can't let that be...I will do things better..." -Elementary Instructor

"This has been a great experience and learning time for me. I've learned something about math I thought I would have never known until you showed it in a small-group setting. Way to go!" -Elementary-Level Teacher

"I like this organizational framework for math and am looking forward to using it in reading." -Elementary Reading Teacher

"Clipboard Cruising is a great idea to observe student progress." -Elementary Teacher

"I think I can...I think I can...I think I can..."
-The Little Engine That Could & This Teacher

"I can do this because we already do small groups in Pre-K. This training will help me refine my small group Teacher Time and pay closer attention to how I plan and implement." -Pre-K Teacher

"This workshop gave lots of great ideas to use and very good ideas for organizing groups and making every activity fun, hands-on, and meaningful. Now just to implement it all. As Head Start, we do small groups, large groups, and centers already, but this had really helped me to organize better." -
Head Start Teacher

"This has been a wonderful workshop. This will help me to reach all students...not just some students...but EVERY student!" -
Elementary Teacher

"I feel that for the first time I can truly teach my students. I have felt at a loss to truly impact learning. I now have an idea—actually, many ideas—and the support to follow through. I will make my students successful and have fun doing it!!!" -
Kindergarten Teacher

"This is sometimes overwhelming, but it's not about me, it's all about the students." -
Elementary-Level Teacher

"The last two days we covered a huge amount of valuable information and I can't wait to sit alone with my thoughts to process it all into useable chunks that will transform the way I teach math." -
Primary Teacher

"This was wonderful for me! I feel as if I already do a lot of these things in my classroom and this gave me the encouragement to make myself even better. This will help me to be more organized and in implementing it through to the end of the year. Thank you!" -3rd Grade Teacher

"I have been motivated to go back to the ways I taught years ago. I love the organization of this framework. I hope and know it will simplify my life. God bless you!"
-1st Grade Teacher

"This is great! Now I have to get the information from Glenna to use it in my ELA classroom. The Tabor Rotation Framework has a place to put all effective elements and make them work. Thank you!" -4th Grade Teacher

"This is a lot of information, but I am very excited to meet with my team and get started!!! I think this will be very beneficial for the children and teachers of Jefferson ISD." -Elementary Teacher

"I cannot wait to start the Tabor Rotation in my music classroom. This will help me prepare my students for independent learning. Thanks!" -Elementary Teacher

"This is going to mean change. I once heard it said, 'If we do what we've always done, we'll get what we've always got.' This change is going to be good!" -Elementary Teacher

"I'm overwhelmed, but equally excited for the changes I'm about to make with my students. Change is really hard, but oh so necessary!" -Elementary Teacher

"This has helped me to prepare for the year. I feel like it's going to help me with what I've already done in the past but apply it and make it more effective." -Intermediate Teacher

"As someone who has already been using mini-lessons, groups, and stations, I really like the framework. I'm excited about the planning piece because that's something I've not really had before. Stations and groups are great, but without proper prep and planning, it isn't as effective. I'm glad that so many people are excited about it!" - Elementary Teacher

"I am now able to visualize, from the start, student success in math using Tabor Rotation. I LOVE IT!" -Elementary-Level Teacher
