

Equivalent Concentration

Object: To match fraction bars whose shaded amounts are equivalent

Players: 2-4

Materials: Fraction Bars

Directions:

- Spread the bars face down in rows and columns.
- Player one (of a partner pair) turns over one fraction bar and identifies the fraction.
- Player two (of a partner pair) turns over a second fraction bar and identifies the fraction.
- If the fractions are equivalent, the partners win the two bars and continue their turn with two more bars.
- If the bars are not equivalent, then the bars remain face up and the next pair of players begins their turn.
- Play continues as time allows.
- When no more combinations are possible, the partners with the most bars win.
